The Exchequer openeth 8. dayes before any Terme doth begin, except Trinity Terme, before which it openeth only 4. dayes.

NOw for the hearing, and the determining of all Contracts, Diſcords and ſuch like matters in the Common-wealth, theſe foure times commonly called the *Termes*, be appointed, in which the learned Iudges ſet an end of Contention, and debate, betweene party and party.

Every of theſe 4. *Termes*, conſiſts of 4, 7, or 8, *Returnes*, every *Returne* of 4. daies, and every day ſerving unto a ſeverall purpoſe.

Note then, that every *Terme* hath part of all theſe 6. kind of *Returnes*, viz. *Craſtino Octabis, Quind: Tres, Menſe, & Quinq; Craſtino*, is the Morrow after the *Baſis*, or day nominated: a *Craſtino Trinitatis*, is the morrow after *Trinity* Sunday, it being the *Baſis*, and day that gives the denomination. *Octabis* is 8. dayes after inclusively. *Quind:* is 15. daies after. *Tres* that day 3. weeks. *Menſe* that day Month, and *Quinq;* that day five weekes

Now every of theſe *Returnes*, hath 4. ſeverall dayes, whereon they conſiſt: the firſt whereof hath a double ſignification, the one is the day of *Returne*, and the other the day of *Eſſoyne* for the Defendant, in a perſonall action, or the Tenant in a reall action, to be Eſſoyned. The ſecond, is the day of *Exception*, for the Plaintiffe or demandant to lay an Exception, if no Eſſoyne be caſt, that the Defendant ſhall not be Eſſoyned, or Amerced. The 3. is *Returna Brevium*, that is, the day whereon the Sheriffe muſt returne the Writ. The 4. is the day of appearance for Parties, and Iuron in the *Court* of *Common Pleas*.

If any of theſe daies fall upon an Holy-day, that is no *Court* day, as in *Hillary* Terme, upon the day of *Purification*: In *Eaſter* Terme, upon *Aſcenſion* day; In *Trinity* Terme, upon the Nativity of S. *John Baptiſt*. And in *Michaelmas* Terme upon the day of *All-Saints*, or upon any Sunday (all which, be no *Court* daies) then muſt the next day following ſerve for both, as if the Eſſoyne day fall upon Sunday, then Munday muſt ſerve for the Eſſoyne day, and the day of Exception both.

Theſe dayes have all moſt uſe in the *Court* of *Common-Pleas*.

But Latitats, or others Proceſſes upon a Bill certaine, it is upon a day certaine: As *Die Lunæ proxime poſt Purif:* which muſt alwayes be reckoned from the Eſſoyne day.

In

In the Starre-Chamber, Chancerie, Court of Wards, and Court of Requeſts, they uſe none of theſe Returnes, but onely the day of Appearance, which is *Quarto Die poſt.*

Yet note well, that if a *Capias*, *Exigent*, *Scire facias*, or a *Diſtringas* be executed after the day of Eſſoyne, by the Sheriffe of a Commiſſion ſate upon out of any the aforeſaid Courts, after the ſaid Eſſoyne day, it is neither juſtifiable, nor warrantable.

The Law-dayes in the Court of *Arches*, *Audience*, *Prerogative*, *Conſiſtory* in *Pauls*, *Delegates*, *Admirall* Court, and *High-Commiſſion*, as they be uſually kept in the Terme-time.

THe firſt day of every of the feaſts ſet downe for every terme in the Court of *Arches* is kept in the forenoone in *Bow Church*: And the *Admirall* Court the ſame day in *Southwarke* in the afternoone.

The ſecond day after every of the Feaſts, the *Audience* Court is kept in the forenoone in the *Conſiſtory* in *Pauls*, and the *Prerogative Court* in the ſame place in the afternoone. The third day following every of the ſaid Feaſts, the Biſhop of *London* his *Conſiſtory Court* is holden in *Pauls* in the forenoone, and his Majeſties *Court* of *Delegates* in the ſame place afternoone. The 4. day following the ſaid feaſts his Majſties *Court of high Commiſſion*, in the *Conſiſtory* in *Pauls*, or (as of late yeares) at *Lambeth*, or in the Lord Biſhop of *London* his Palace, on Thurſday afternoone, but if any of the daies before recited be Sunday, or an holy day, then is ſuch Court kept the day following.

In *Hilary* Tearme, 4. of the above named *Court* dayes, be ordinarily kept, and as many in *Eaſter* and *Trinity* Termes: according to the courſe of the yeere, as the Iudge in the *Arches* in his diſcretion ſhall thinke good, Alſo at the end of every Terme appointeth the *Court* dayes to be kept in the next Terme, but in *Michaelmas* Terme the *Court* daies (if they be not altered) were wont certainely to be kept.

I therefore adviſe all Country-men (eſpecially thoſe that dwell farre of) being cited by any originall proceſſe to appeare in the *Arches*, *Audience*, *Prerogatiue*, or *Delegates*, to ſend to ſome Proctor, a note of the courſe and to what *Court* they bee cited, to appeare for them, and to returne them word of the very day in which it ſhall be needfull for them to appeare perſonally.

But in the courſe of practiſe in the *High Commiſſion*, and *Admirall Court*, it is otherwiſe, for every perſon ſo cited muſt of neceſſity appeare perſonally.

Scientia non habet Inimicum niſi Ignorantem.

Genera

Generall Observations, and profitable to be regarded.

REmoue, and set young Trees, from October vntill February, setting alwayes that side towards the Sunne, which was before, the Wind being Southerly, or West, the weather warme, dry, and at new Moone.

Graft and plant Trees, the Moone being new, in Taurus, Virgo, Capricorne, in faire, dry weather, the wind, S. or west.

Cut vines in December, or Ianuary.

Fell timber to continue, and to auoid Wormes, in December, or Ianuary, 2. or 3. dayes before the Moone ecl a ge.

But if you will haue it to grow againe, in the new Moone is best.

Cut hedges betweene the change and full Moone, from the end of Ianuary, vntill May.

Sheare Sheep, cut hayze, and sow all manner of Corne in the new of the Moone.

Set and Sow all kinde of Seeds, the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricorne, Aquarius, or Pisces, but for Seeds whose roots be round they should be sowne or set 3 or 4. dayes before or after full Moone, viz.

Dung land that weeds may not abound in, or last quarter

Geld or lib cattell, the Moone in Aries, Libra & Sagitarius, after a full Moone: but you may let them bloud at any time, the signe not being in the heart, nor in the place where Incision is made, nor in the day of the Moones change.

Gather Flowers, or Seeds such as you minde to keep all the yeare at the full Moone. Dry them in the shade till they be almost dry, and then Sunne them a little lest they mould, or corrupt, they will endure the beames of the Sunne.

Gather Apples, and Wardens, in the last quarter of the Moone; lay every sort by it selfe without any tainting among them vpon the bare boords or plastered floore, vntill the end of November, the thinner they lye the better. let the place be shut in frosty cold weather, then to couer them ouer with Hay, or Warty chaffe, will not be amisse: but Wardens gathered, and layd on dry boards, need not any couering.

Profitable Rules for Gardening.

1 In the Southerne parts neere the Sea, Gardening may be more timely done than Northward, and in the midst of the Land, where the ayre is not so warme, and favourable.

2 In setting hearbes, leave no top more than an handfull above the ground, nor more then a foot deepe in the earth.

3 Twine the roots of those slips you set if they will abide it, but Gilliflowers are too tender.

4 Set moyst, and sow dry.

5 Set slips at any time, except about Midsommer, or in frosts.

6 Weeding spoyles the most Roots, by drawing the heart, and sap from them.

7 Gather for the Pot, and Medicines, hearbs tender and greene, the sap being in the top, but in Winter the Root is best.

8 Tilhearbs once in seven yeares would be renewed, except Rosemary.

9 Thels require whole plots, Artichokes, Cabbages, Turneys, Parsenips, Onions, Carrots, Skirrets, and Sperrits.

10 Gather all your Seeds, dead, ripe, and dry.

11 Lay no dung to the roots of your hearbes, for dung not rotten is too hot, even for trees also.

12 Thin (setting and sowing (so that the Roots stand not above a foot distance) is profitable; for the hearbs will like the better, and greater hearbes require more distance.

13 Set, and sow hearbes in their time of growth (except about Midsommer, for then they are to tender) but trees in their time of rest.

14 A good Housewife may and will gather stors of hearbs for the pot about Christmas, and dry, and pound them, which in Winter will be her good service.

15 Wash your Garden with weeding knives or Sythes after a shower of raine, and let the Worm is learne to know hearbs and Trees, from Weeds.

General

Generall Rules of Physicke.

CVt no Veyne nor let blood, when the Signe is in the place where the incision is to bee made, neither when the Sun or Moone are afflicted with malignant Planets, as *Saturne*, or *Mars*: let it bee done in the morning, after the Sun rising, and while the patient is fasting: If in the afternoone, then after perfect digestion, the aire being temperate.

In letting of blood, the Physitian or Chirurgion must be carefull of his patient, for many times the careleſſe and unlearned, by letting of blood, open a way to dangerous infirmities, and sometime to present death. It is not convenient, that a leane or weake man or woman, or one that is very fat or grosse, nor for a Child to be let bloud. It is to be considered, how it standeth with the Patient inwardly for his Complexion, and Age, for the time of the yeare, and the day. Therefore it is best to let bloud in faire, temperate, and Sun-shine weather, not to sleepe prelently after it, nor to stirre violently.

The best times to let blood bee for the Sanguine, the Moone being in *Cancer*, or *Pisces*, For the Melancholie, in *Libra* or *Aquarius*; and for the Phlegmaticke, in *Aries* or *Aquarius*.

For the Phrensie, and pestilence, Squinancy, Plurisie, Apoplexie, continuall Head ach, hot burning Feaver, or any other extreame paine, or dangerous disease, remedie must bee sought with all convenient speed, but blood not let in so great quantitie.

It is best to bathe, the Moone in *Aries*, *Leo*, or *Sagittarius*, for health, but for cleanlineſſe in *Libra* and *Pisces*.

Sweatings they are of two sorts, that is Naturall, and Artificiall; so they be for two purposes. The Naturall sweat (good heed being taken in opening the pores) will dissolve grosse, and thicke humors, cleanse the blood, comfort the Spirits, drive away cold, help Numnesse and the Dropsie. The Artificiall Sweat, will cleanse Scabs, put away Itch, amend dulnesse in hearing, ease the Stone, dissolve congealed and cold Melancholy blood, and humors. But for the better performing, take counsell of the Physitian.

The best times to sweate in are, the Moone being in *Aries*, *Leo* and *Sagittarius*.

Notes

Beware of Physicall drugs at any time so much as in thee lyeth as things contrary to nature and also good nutriment, especially the weather being exstreame hot or cold, or in the dogge dayes, secondly, the Moone decreasing which is farre better then the increase of the Moone. Thirdly, the best signes that are iudged by the learned, the fittest to purge in are *Cancer* for al Electuaries, *Scarpio* for potions, *Pisces* for pils, your best times to purge Melancholy in, are the Moone in *Gemini*, *Libra*, or *Aquarius*, but you must have an especiall care that you purge not at all when the Moone is in any of these signes, *Aries*, *Taurus*, *Capricorne*, and *Leo*, because they do easily provoke casting or vomit.

Conjectures of Diseases by the Temperature of the ayre.

A Windy and drie spring bad for old Folkes and childbearing Women, a very wet spring is a signe of dangerous Agues in the Summer following with apostumes plurisies, &c. A very cold and wet spring, with South winds, dangerous infectious diseases are to be much feared.

A very hot and drye Summer, brings Measels, small Pox, Agues, with paines in the head. Very hot and moyst, is also like to cause sharpe Agues, and bloudy Flux, but cleere with North winds good for flegmaticke Persons.

Autumne dry and full of cold North winds doth greatly hey those of a melancholy complexion with daily Agues and other diseases, but is good for women and such flegmaticke creatures, very moist and cold breedeth Coughes, stopping head-ache, &c. against Winter.

The Winter dry and full of South winds without frosts bringeth paines in the brest, costiuenesse in the belly, stopping of Urine, exulcerations with Inflamations and sharpnesse of Urin.

Notes

Notes of Husbandry, with some other things to be considered, in every Month of the yeare.

HUsbandry doth alter according to the Nature of Countrys, for as the earth, the ayre, the little, or much heat, cold, or moysture doth increase, or diminish: so must good Husbandmen change their seasons, labours & instruments, In the fruitfull Vales of this land, where is stiffe clay, and in all other places of the like nature, tillage must begin betime in the yeare, the Plowes, and other Implements must be large and strong the labour great, and painfull: In mixt soyles fruitfull, arrable worke would be begun at latter seasons, the Plowes, other necessaries, and labours are to bee somewhat lesse then the other: In light Sandy grounds, that be fruitfull, their seasons be latest, their furniture, and labour least. Lastly, in barren, and unfruitfull fields the fit season of the yeare is to be considered, for in all places (Annus fructificat, non Ager) and the Plowes, and Implements must euer be fitted to the nature of the ground.

IN this, and the end of the last Month, gather Hops when they wax browne, the weather being faire, and no dew on the ground, till Bees; Make Verjuice; sow Wheate and Rye; Remoue and set all slips of Flowers between the two Lady dayes; Remoue trees, euery new Moone from September, vntill February, especially in the new of the Moone the weather faire, and warme, the wind South or West, vse Physick moderately: Forbeare fruits too pleasant or rotten, and (as death) shun rest and surfetting.

October.

SOw Wheat and Rye, but chiefly in the beginning for feare of raine in the end: set and remoue young Trees in the New of the Moone. Sow Acornes, and Nuts, Cut Rose trees (if you desire to haue store of Roses) but once in two yeares. Gather Winter fruit, in the old of the Moone, the weather dry, and after Noone. Get warme cloathing, and goe dry-shod, and for health refuse not any Physicke, from the hands of the learned.

Novem-

November.

IN the begining of this Moneth sow Wheat, and Rye, in hot ground. Cut downe Ashes for Plow timber: Make Malt. Kill Hogs. Trench gardens with dung. Set Crabtree stocks. Use wholsome meates, and drinks, with good exercise to preserue health.

December.

IN this and the next Moneth cut downe great timber in the old of the Moone, brush hedges. Uncouer rootes of fruit Trees. Set Beanes, and Pease. Cover your best flowers and hearbes from frosts and stormes. with rotten old horse dung. Looke well to cattell. Let horses blood. Eate meats hot and nourishing. Drinke good Wine, and strong drinks. Keepe thy body well clad, and thy house warme. Banish all cares from thy heart, and conclude the yeare with feasting thy poore neighbours reioycing together, that God about this time sent his onely begotten Son into the world.

Coniectures of weather by the Change, Full, and Quarters of the Moone.

WHen the Moone doth change be at the full or enter into the first or last quarter in Aries, Leo, Sagitarius, in Winter it is commonly faire but in Summer hot, especially in Iune, and Iuly.

If the change, be at full, or enter in the first or last quarter, in Taurus, Virgo, or Capricorne, it is like to bee cold in Winter, but in Summer temperate.

When the said times bee in Gemini, Libra, Aquarius, they look for wind, especially in the spring or Autume or harvest.

But if the Moone be new at the full or come to the first or last quarter, in Cancer, Scorpio, or Pisces, in Winter Iudge moyst weather, sometime Snow, but in Summer temperate for the most part, yet sometimes it raineth especially then when Venus is aspected with the Sunne.
